

SPIRITS OF THE  
**BLUE RIDGE**  
VODKA

*From the waters of Virginia's pristine mountain range, Spirits of the Blue Ridge is polished like the stones that line the area's river beds through five days of continuous filtration. Infusing the sweetness of gluten-free distillates of corn complete our spirit.*

**BRING IT HOME**

Headquartered in Virginia Beach, VA, the Chesapeake Bay Distillery was established by local residents who were inspired to create small batch spirits of exceptional quality featuring local ingredients. After three years of product development, we are excited to release Spirits of the Blue Ridge.

What makes a top shelf vodka? While each brand may have a unique flavor, the market demands a smooth spirit. We have taken this to the extreme and created a new breed of vodka. Only our small batch production with diligent quality control allows for a vodka so clean.

While the corn base provides the subdued taste, our product differentiation comes from our unique filtration process. Through a variety of media, including traditional carbon, the spirit is polished to incomparable levels over five days.

The result: smoothness and universal appeal with packaging to match.
